SUMMARY

Backend .NET Developer specializing in scalable, production-grade APIs and distributed systems. Grounded in Clean Architecture, OOP, and database design — with an algorithmic edge built from solving 400+ problems on Codeforces. Proven team leader committed to continuous growth and knowledge sharing within the developer community.

EXPERIENCE

DEPI Round 3 — Digital Egypt Pioneers Initiative

Jun 2025 - Dec 2025

Team Lead & Backend .NET Engineer

Hybrid, Zagazig, Egypt

- Led a cross-functional team of 5 over 6 months to architect and deliver ShurYan, a scalable digital healthcare platform, from concept to a fully deployed production system.
- Designed the entire backend using Clean Architecture across 4 decoupled layers — engineering 33 REST API controllers exposing 100+ endpoints, orchestrating 36 Application Services across 5 distinct role-based portals, and architecting a highly normalized 47-table SQL Server database.
- Awarded **Best Project in the Full Stack .NET track** among all competing teams in DEPI Round 3.

Zag Eng Community

Dec 2025 - Present

.NET Co-Lead

Hybrid, Zagazig, Egypt

- Co-deliver structured sessions covering core and advanced .NET concepts as part of a collaborative teaching team, reinforcing learning through hands-on tasks and real-world projects.

ICPC Zagazig

Feb 2025 - Present

Competitive Programming Mentor

Remote, Zagazig, Egypt

- Individually mentor students on competitive programming fundamentals, algorithmic problem-solving, and data structures in preparation for ICPC regional rounds.

E-Commerce Team Project

Sep 2025 - Oct 2025

Backend Developer

Remote

- Collaborated in Agile sprints with a 3-developer team, designing and optimizing RESTful APIs for 3 core modules — Products, Orders, and Users — using ASP.NET Core and Entity Framework.
- Enforced a structured Git branching strategy (feat, bug-fix) across the team, maintaining clean version control and stable deployment pipelines.

PROJECTS

ShurYan — Digital Healthcare Platform

DEPI Round 3 · Best Project — Full Stack .NET

Technologies: C#, .NET 8, ASP.NET Core, EF Core, SQL Server, JWT, Clean Architecture, Cloudinary, MailKit

A scalable digital healthcare infrastructure unifying Patients, Doctors, Pharmacies, and Laboratories across 33 REST API controllers and 100+ endpoints, backed by a 47-table SQL Server database and 36 Application Services. Architected on Clean Architecture with Repository/Unit of Work. Features include digital prescription management, geolocation-aware emergency dispatch, cloud media handling (Cloudinary), and asynchronous email delivery (MailKit).

Technologies: C#, ASP.NET Core, EF Core, SQL Server, LINQ, Git Flow

A RESTful API for an e-commerce platform developed with ASP.NET Core, covering products, orders, carts and authentication across 3 core modules. Utilized layered architecture and Git Flow for structured, Agile team development.

Technologies: Java, Java Swing, OOP, Java 2D Graphics

An arcade-style Brick Breaker game with multiple levels, score tracking, and collision detection. Developed with Java 2D graphics and object-oriented design principles.

Technologies: C++, Data Structures, Windows Multimedia API

A C++ application for managing Quranic recitation playlists using custom doubly-linked lists, file persistence, and Windows multimedia APIs for full playback control.

EDUCATION

Sep 2023 - Present **Zagazig University** — B.Sc. in Computer Science (3rd Year) · GPA: 3.2 / 4.0

TECHNICAL SKILLS

Backend	ASP.NET Core, C#, Entity Framework Core, LINQ
Architecture	Clean Architecture, Repository Pattern, Unit of Work, RESTful API Design
Auth & Security	JWT, Refresh Token Rotation, Google OAuth 2.0, RBAC
Database	SQL Server, MySQL, EF Core Migrations
Tools	Git, GitHub, Postman, Swagger, LaTeX
Soft Skills	Team Leadership, Technical Mentorship, Cross-functional Collaboration
